

Listing of Claims:

Claim 1 (currently amended) An isolated polypeptide selected from one of the groups consisting of:

- (a) an isolated polypeptide encoded by a polynucleotide comprising ~~thesequence~~ the sequence of SEQ ID NO:1 from nucleotide positions 1-474;
- (b) an isolated polypeptide comprising a polypeptide sequence having at least 95% identity to the polypeptide sequence of SEQ ID NO:2;
- c) an isolated polypeptide having at least 95% identity to the polypeptide sequence of SEQ ID NO:2; and
- d) the polypeptide sequence of SEQ ID NO:2 and
- (e) fragments ~~and variants~~ of such polypeptides in (a) to (d) that are immunospecific for said polypeptides.

Claim 2 (original) The isolated polypeptide as claimed in claim 1 comprising the polypeptide sequence of SEQ ID NO:2.

Claim 3 (original) The isolated polypeptide as claimed in claim 1 which is the polypeptide sequence of SEQ ID NO:2.

Claim 4 (currently amended) An isolated polynucleotide selected from one of the groups consisting of:

§Appl. No. 10/049,568
Amdt. dated September 3, 2003

- (a) an isolated polynucleotide comprising a polynucleotide sequence having at least 95% identity to the polynucleotide sequence of SEQ ID NO:1;
- (b) an isolated polynucleotide having at least 95% identity to the polynucleotide of SEQ ID NO:1;
- (c) an isolated polynucleotide comprising a polynucleotide sequence encoding a polypeptide sequence having at least 95% identity to the polypeptide sequence of SEQ ID NO:2;
- (d) an isolated polynucleotide having a polynucleotide sequence encoding a polypeptide sequence having at least 95% identity to the polypeptide sequence of SEQ ID NO:2;
- (e) an isolated polynucleotide with a nucleotide sequence of at least 100 nucleotides obtained by ~~screening a library under stringent hybridization conditions with~~ hybridizing, at 42°C in a solution comprising 50% formamide and 5XSSC, a labeled probe having the sequence of SEQ ID NO: 1 or a fragment thereof having at least 15 nucleotides with a library comprising nucleic acid;
- (f) a polynucleotide which is the RNA equivalent of a polynucleotide of (a) to (e);

or a polynucleotide sequence complementary to said isolated polynucleotide

and polynucleotides that are ~~variants and~~ fragments of the above mentioned polynucleotides and specific thereto or that are complementary to above mentioned polynucleotides, over the entire length thereof.

Claim 5 (original) An isolated polynucleotide as claimed in claim 4 selected from the group consisting of:

- (a) an isolated polynucleotide comprising the polynucleotide of SEQ ID NO:1;
- (b) the isolated polynucleotide of SEQ ID NO:1;
- (c) an isolated polynucleotide comprising a polynucleotide sequence encoding the polypeptide of SEQ

§Appl. No. 10/049,568

ID NO:2; and

(d) an isolated polynucleotide encoding the polypeptide of SEQ ID NO:2.

Claim 6 (currently amended) An expression ~~system~~ vector comprising a polynucleotide capable of producing a polypeptide of claim 1 when said expression vector is present in a compatible host cell.

Claim 7 (currently amended) A recombinant host cell comprising the expression vector of claim 6 or a membrane thereof expressing the polypeptide of ~~an isolated polypeptide~~ selected from ~~one of the groups~~ group consisting of:

(a) an isolated polypeptide encoded by a polynucleotide comprising ~~thesequence~~ the sequence of SEQ ID NO:1 from nucleotide positions 1-474;

(b) an isolated polypeptide comprising a polypeptide sequence having at least 95% identity to the polypeptide sequence of SEQ ID NO:2;

(c) an isolated polypeptide having at least 95% identity to the polypeptide sequence of SEQ ID NO:2; and

(d) the polypeptide sequence of SEQ ID NO:2 and

(e) fragments ~~and variants~~ of such polypeptides in (a) to (d) that are immunospecific for said polypeptides.

Claim 8 (currently amended) A process for producing a polypeptide of ~~an isolated polypeptide~~ selected from the group ~~one of the groups~~ consisting of:

(a) an isolated polypeptide encoded by a polynucleotide comprising ~~thesequence~~ the sequence of

§Appl. No. 10/049,568
Amdt. dated September 3, 2003
Reply to Office Action of March 6, 2003

SEQ ID NO:1 from nucleotide positions 1-474;

(b) an isolated polypeptide comprising a polypeptide sequence having at least 95% identity to the polypeptide sequence of SEQ ID NO:2;

(c) an isolated polypeptide having at least 95% identity to the polypeptide sequence of SEQ ID NO:2; and

(d) the polypeptide sequence of SEQ ID NO:2 and

(e) fragments ~~and variants~~ of such polypeptides in (a) to (d) that are immunospecific for said polypeptides.

comprising the step of culturing a host ~~of as defined in claim 7~~ under conditions sufficient for the production of said polypeptide, and recovering the polypeptide from the culture medium.

Claim 9 (original) A fusion protein consisting of the Immunoglobulin Fc-region and any one polypeptide of claim 1.

Claim 10 (previously amended) An antibody immunospecific for the polypeptide of claim 1.

Claim 11 (currently amended) A method for screening to identify compounds that stimulate or inhibit the function or level of the polypeptide of claim 1 comprising a method selected from the group consisting of:

(a) measuring or, detecting, quantitatively or qualitatively, the binding of a candidate compound to the polypeptide (or to the cells or membranes expressing the polypeptide) or a fusion protein thereof by means of a label directly or indirectly associated with the candidate compound;

(b) measuring the competition of binding of a candidate compound to the polypeptide (or to the cells

or membranes expressing the polypeptide) or a fusion protein thereof in the presence of a labeled competitor;

(c) testing whether the candidate compound results in a signal generated by activation or inhibition of the polypeptide, using detection systems appropriate to the cells or cell membranes expressing the polypeptide;

(d) mixing a candidate compound with a solution containing a polypeptide of claim 1, to form a mixture, measuring activity of the polypeptide in the mixture, and comparing the activity of the mixture to a control mixture which contains no candidate compound; or

(e) detecting the effect of a candidate compound on the production of mRNA encoding said polypeptide or said polypeptide in cells, using for instance, an ELISA assay, and

~~(f) producing said compound according to biotechnological or chemical standard techniques.~~

Claim 12 (newly added) A method of producing a compound that stimulates or inhibits the function of the polypeptide of claim 1, comprising identifying a compound according to claim 11, and producing said compound according to biotechnological or chemical techniques.

Claim 13 (newly added) The isolated polypeptide of claim 1, wherein the polypeptide fragment comprises amino acid positions 72, 74, 93-97, or 122 of SEQ ID NO:2.

Claim 14 (newly added) The isolated polynucleotide of claim 4, wherein the polynucleotide comprises nucleotide positions 215, 220-221, 277, 286-287, 364, 402-403, or 436 of SEQ ID NO:1.
